

Special Issue

Optimization and Control of Integrated Water Systems

Message from the Guest Editors

This Special Issue on the "Optimization and Control of Integrated Water Systems" will bring together methodologies for the optimization, supervision, and control of integrated water systems using advanced operational strategies. Topics include but are not limited to the following:

- Theoretical and practical advances in modeling, simulation, and control of integrated water systems
- Hybrid systems and mixed-logical dynamical modeling for control of IWS
- Decentralized and agent-based modeling of IWS
- Optimization of IWS and their components
- Environmental and economic distributed MPC control of IWS
- Multi-agent game-based distributed MPC of IWS
- Decentralized, cooperative, and coordinated distributed MPC control of IWS
- Networked systems and sectorization methodologies
- Weather forecasting disturbance inclusion in control algorithms applied to integrated water systems
- Learning Strategies for multi-agent systems
- Data-driven fault detection, diagnosis, and prognosis solutions for integrated water systems
- Life cycle assessment of integrated water systems
- Water-energy nexus
- Smart technology and IoT impact on integrated water system management

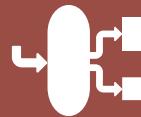

Guest Editors

Prof. Dr. Pastora Isabel Vega Cruz

Department of Computer Science and Automatics, Universidad de Salamanca, Salamanca, Spain

Prof. Dr. Ramón Vilanova Arbós

Department of Telecommunication and System Engineering, Universitat Autònoma de Barcelona, Barcelona, Spain

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
