# Multi-Period Optimization of Sustainable Energy Systems

## Message from the Guest Editors

This Special Issue on "Multi-Period Optimization of Sustainable Energy Systems" aims to curate novel advances in the development and application of PSE and alternative tools to address longstanding challenges in the synthesis and design of sustainable energy systems for multi-period operations. Topics include but are not limited to:

- Energy-related resource conservation networks;
- Distributed multi-functional energy systems (e.g., trigeneration and polygeneration systems);
- Regional or sectoral low-carbon energy systems;
- Bioenergy supply chain networks;
- Penetration of renewable energy through energy storage; and
- Power-to-X (P2X) systems.

# About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
