

## Special Issue

# Design and Preparation of Pharmaceutical Formulation

### Message from the Guest Editor

Many drugs have been developed for the numerous diseases that occur in humans. However, most drugs typically face two problems—biocompatibility and bio-availability—in clinical cases. To solve such problems and to maximize therapeutic effects, drug formulation development is necessary. The Special Issue, **Design and Preparation of Pharmaceutical Formulation**, aims to publish articles in the rapidly developing area of smart drug delivery systems. The scope of the issue covers topics related to colloidal carriers for drug delivery, such as liposomes, vesicles, emulsions, micelles, nanoparticles, and nano-emulsions, and other smart assembly systems for the improvement in drug delivery. This Special Issue is focused on manufacturing parameters and formulation variables that affect the performance of drug delivery systems. It is our pleasure to invite you submit a new manuscript to this Special Issue. Full papers, communications and reviews are welcome.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
