

Special Issue

Various Postharvest Storage Technologies of Food Crops

Message from the Guest Editors

Food crops, including fruits, vegetables, and grains, require proper postharvest storage. Currently, a considerable amount of food crops produced globally is wasted before reaching consumers. In order to solve this crucial issue in the food chain, various postharvest storage technologies need to be applied and utilized. Therefore, this Special Issue welcomes original research and review articles that provide insights into all topics related to postharvest biology and the technology of food crops. The scope of submission includes all aspects of postharvest technologies including (1) non-destructive quality evaluation, (2) modified atmosphere packaging or controlled atmosphere storage, (3) storage or food crops disinfection, (4) edible-coating, (5) ethylene physiology and regulator agents (1-Methylcyclopropene), (6) and other state-art-of-technologies or methods.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
