

## Special Issue

# Process Design, Integration, and Intensification

### Message from the Guest Editors

This Special Issue on “Process Design, Integration, and Intensification” aims to cover recent advances in the development and application of process integration and intensification. Topics include, but are not limited to, methods and/or application in the following areas:

- Systematic approaches to mass, energy, and property integration
- Unit and system intensification
- Conservation of natural resources
- Mitigation of environmental impact
- Techno-economic studies of emerging processes (e.g., shale gas monetization, biorefining)
- Integration of renewable energy in industrial processes
- Inherently safer design
- Metrics for assessing integration and/or intensification
- Eco-industrial parks

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
