

Special Issue

Process Intensification in Chemical Reaction Engineering

Message from the Guest Editors

The development of Process Intensification requires the deep understanding of several aspects which comprise CRE, spreading from reactor modelling/design to the investigation of microfluidics, treating with rigour the physical and chemical phenomena occurring in the reaction network. This Special Issue on “Process Intensification in Chemical Reaction Engineering” aims to illustrate novel trends in CRE to demonstrate that with the right approach, it is possible to aim the PI of a chemical process.

- microreactors and micromixers
- static mixers
- alternative sources of energy: microwave and ultrasound
- two unit operations in one apparatus: reactive chromatography/reactive distillation
- alternative fluids: supercritical fluids, ionic liquids, SILCA
- structured catalysts; foams, monoliths, 3D-printed structures

Guest Editors

Prof. Dr. Vincenzo Russo

Dr. Stefan Haase

Dr. Pasi Tolvanen

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P.
Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
