

Special Issue

The Process and Modelling of Renewable Energy Sources

Message from the Guest Editors

This Special Issue “The Process and Modelling of Renewable Energy Sources” will particularly focus on the economic benefits of renewable and sustainable energy, which may include:

- Renewable energy technologies (biomass, solar, geothermal, hydraulic, ocean, wind energy);
- Technologies of energy plants, plantations, varieties, energy use of organic wastes and by-products;
- Energy efficiency technologies;
- Complex energy and circular systems, local self-sufficiency in energy supply;
- The economic and environmental background of the above-mentioned technologies;
- Case studies, investment analysis;
- Results of questionnaires in renewable energy topics;
- Methodological questions of renewables and of energy policy.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
