

## Special Issue

# Anaerobic Digestion for Bioenergy and Biochemicals Production

### Message from the Guest Editors

Anaerobic digestion (AD) of biomass and organic waste has an important potential for the generation of renewable and sustainable energy. Methane, the desired product from AD, can be used for electricity, heat, and as transport fuel. Although AD has been in commercial use for many decades, most of its potential in energy generation is yet to be delivered. This Special Issue seeks high-quality work which contributes to advancing AD and getting it closer to delivering its full potential. Topics include, but are not limited to:

- Innovative AD processes;
- Improvements in AD technology and processes;
- Pre-treatments;
- New sustainable feedstocks;
- Use of AD for organic acids and hydrogen production;
- Microbiology of AD;
- Economics and life cycle assessment of AD

---

### Guest Editors

Dr. Davide Dionisi

School of Engineering, Fraser Noble Building Kings College, University of Aberdeen, Aberdeen AB24 3UE, UK

Dr. Yue Zhang

Faculty of Engineering and Physical Sciences, University of Southampton, Southampton Boldrewood Innovation Campus, Southampton SO16 7QF, UK

---

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
