Recent Advances in Resource Recovery from Waste

Message from the Guest Editor

The focus of this Special Issue is on materials recovered from waste and their applications for pollution control, energy, and catalysis in the context of sustainability, circular economy, and the environment. Submissions should include original research, mini- and full-length reviews, and perspectives on waste utilization and resource recovery. Keywords:

- Waste utilization
- Chemical products from waste
- Waste-to-energy technologies
- Design of waste collection
- Materials from waste and their applications
- Life cycle analysis of resource recovery from waste
- Economic and sustainability analysis
- Waste valorization

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
