Various Sustainable Energy Technologies in Buildings

Message from the Guest Editor

This Special Issue “Various Sustainable Energy Technologies in Buildings” aims to present scientific contributions focused on related topics, including:

- Renewable energy technologies for thermal energy applications,
- HVAC systems,
- Air source and ground source heat pumps,
- Direct and indirect evaporative cooling,
- Co-generation systems,
- Building energy performance analyses,
- Energy policy studies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
