

Special Issue

Sustainable Modelling, Processes and Applications for Societal Development

Message from the Guest Editors

These approaches include modeling to deal with simulation, change of matter, time and space, analytical and statistical analyses, and real case studies for future prediction. The enhancement of all the processes currently used is undoubtedly essential to account for the escalation of various demands stemming from the population growth to the tune of approximately 10 billion by 2050. These processes include physical, biological, and chemical modes for sustainable technicality, treatment, bioremediation, control, production, and development, but also, and perhaps more importantly, applications corresponding to feedstock and products, new materials, operations, systems, theories on identifying and managing tangible and intangible resources, which are indispensable prerequisites in attaining sustainable societal development.

Guest Editors

Prof. Dr. Yoshimitsu Uemura

Dr. Jun-Wei Lim

Dr. Worapon Kiatkittipong

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
