

Special Issue

Systems Biomedicine

Message from the Guest Editors

In this Special Issue "Systems Biomedicine", we encourage manuscripts that utilize and create process systems engineering tools and experimental or computational/mathematical models to make clinically-relevant predictions of physiological functions and to incorporate interactions between medical therapies and healthy and diseased tissues. Topics include but are not limited to:

- Development of new tools to facilitate single- or multi-scale modeling of biomedical systems
- Design of validated experimental (animal, 3D tissue mimic, microfluidic, etc.) or computational/mathematical models of physiological and pathophysiological tissues and/or organ systems for biomedical applications
- Prediction and analysis of physiological or pathophysiological phenomena
- Optimization of schedules of medical interventions or therapies

Guest Editors

Dr. Ashlee N. Ford Versypt

School of Chemical Engineering, Oklahoma State University, Stillwater, OK 74078, USA

Dr. Belinda S. Akpa

Molecular Biomedical Sciences and Electrical & Computer Engineering, North Carolina State University, Raleigh, NC 27607, USA

Deadline for manuscript submissions

closed (31 January 2019)

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
