Novel Technologies in Trace Elements Determination

Message from the Guest Editors

This special issue on “Novel Technologies in Trace Elements Determination” aims to gather outstanding researches and the comprehensive coverage of all aspects related to the development of an innovative analytical techniques and methodologies. Topics include, but not are limited to:

- modern sample preparation techniques for trace analysis;
- modern sample introduction systems;
- hyphenated techniques in atomic absorption, optical emission and mass spectrometry;
- gas chromatography and high-performance liquid chromatography in hyphenated systems;
- macro/micro interfaces for hyphenated techniques;
- the design and development of portable micro-structured analytical instruments.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
