

Special Issue

Gas, Water and Solid Waste Treatment Technology

Message from the Guest Editors

Environmental pollution, including gas pollution, water pollution, and solid waste pollution, are the main social and environmental problems. A variety of treatment technologies, such as physical, chemical, and biological methods, have been used for the treatment of the pollutants. However, there are still information gaps in the fields of treatment processes for gas emissions, wastewater, and solid waste. Herein, we are inviting scholars to submit original research articles, technical notes, and review articles in a broad range of topics for the Special Issue on “Gas, Water, and Solid Waste Treatment Technology”. Experimental and modeling works and life cycle assessment (LCA) or techno-economic analysis (TEA) focused on pollutant treatment processes using emerging and novel technologies in a wide variety of application fields as well as reviews on the recent advances are highly welcome.

Guest Editors

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
