

## Special Issue

# Water Purification Technologies: Advanced Oxidation Processes

### Message from the Guest Editors

With the pertinent question of environmental sustainability, advanced oxidation processes (AOPs) are still not mature, and needs to move further towards global environmental pollution and sustainability. This innovative treatment approach represents a step towards advancing water purification technology in order to reduce environmental risks as well as to promote good water management practices for water and wastewater treatment processes. Together with the advanced development in nanotechnology, ecofriendly and non-toxic natural strategies will be implemented as the new science and technology platform for water reuse. For this reason, it is the intent of this Special Issue to collect new knowledge which shows reliable, useful, and relevant information for efficient, economical, and sustainable water treatment strategies. Experiments at lab-scale, pilot scale, and industrial applications are welcome.

The obtained information will provide further evidence-based data that will facilitate discussion on the effective and efficient removal approaches and responsible action for the sustainable future.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
