

## Special Issue

# Digital Technologies, Materials and Telemedicine in Dentistry

### Message from the Guest Editor

The aim of this Special Issue is to provide evidence-based data on innovative advances and knowledge in diagnostic and therapeutic technologies in the orofacial field. Studies that take innovative approaches or provide original information are of higher priority. Papers discussing prosthesis and dental materials, temporomandibular disorders, and rehabilitation procedures to manage craniofacial defects and malformations are encouraged, as well as those addressing digital technologies, and digital and telemedicine applications. Keywords

- prosthesis
- technologies
- materials
- 3D printing
- temporomandibular disorders
- oral health
- dentistry
- dental materials
- biomaterials
- dental imaging
- digital dentistry
- artificial intelligence
- new technologies
- personalized medicine

## About the Journal

### Message from the Editor-in-Chief

The field of rehabilitation medicine is constantly expanding, all accompanied by the presence of new biomaterials and new concepts of biomechanics. This journal aims to promote the knowledge of new biomedical engineering devices in the prosthetic field. The knowledge and study of new prosthetic devices to rehabilitate parts of the human body certainly promotes research and clinic, improving the expectations of rehabilitated patients and certainly the quality of their life. The scientific society publishing high quality works will contribute to this.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), and other databases.

#### Journal Rank:

JCR - Q2 (Materials Science, Biomaterials) / CiteScore - Q1 (Oral Surgery)
