

Special Issue

State of Art in Hip and Knee Replacement

Message from the Guest Editors

Hip and knee prostheses are incredibly effective procedures whose incidence rate has increased in the last few decades. Their effectiveness has also led to an expansion in the eligible population in terms of age and activity level. Indeed, the field of joint prosthesis surgery is undergoing significant change, and the only way to stay up to date with developments is to collaborate with and understand what opinion leaders are thinking and how it affects their clinical practice. This Special Issue is intended to investigate the state of the art in hip and knee replacement surgery, with the contributions from a significant number of excellent surgeons and other scientists. This is a great opportunity to provide a guide for young surgeons and help them to have a general understanding of the greatest and most important issues in this field today.

Guest Editors

Prof. Dr. Giuseppe Solarino

Orthopaedic and Trauma Unit, Department of Basic Medical Sciences, Neuroscience and Sense Organs, School of Medicine, AOU Consorziiale Policlinico, University of Bari "Aldo Moro", Piazza Giulio Cesare 11, 70124 Bari, Italy

Dr. Umberto Cottino

AO Ordine Mauriziano Hospital, Department of Orthopaedics and Traumatology, University of Torino, Largo Turati 62, 10128 Torino, Italy

Deadline for manuscript submissions
