

Special Issue

State of Art in Hip, Knee and Shoulder Replacement (Volume 2)

Message from the Guest Editors

In this volume of “State of the Art in Hip, Knee and Shoulder Replacement” we will focus on replacement surgeries of the hip and knee—as in the previous one—but we will also include the shoulder, to address all the bigger joints and give a broad perspective on more up-to-date surgical techniques, indications, and results. We are living in a new golden era of orthopedic surgery thanks to the great boost of technology (e.g., robotics, artificial intelligence) that is giving new stamina to research and clinical outcomes; particular attention will be given to this aspect, which in our vision is of paramount importance for the future. It is mandatory for surgeons to have high levels of skill and knowledge to perform a time-saving, tissue-sparing, and highly effective procedure that can give patients a better and faster recovery, reducing the risk of infection or complications. This Special Issue would like to be a thorough investigation of the actual state of the art in hip, knee, and shoulder replacement, with the contributions of great surgeons, scientists, and clinicians that apply the best practices to their patients every day.

Guest Editors

Prof. Dr. Giuseppe Solarino

Orthopaedic and Trauma Unit, Department of Basic Medical Sciences, Neuroscience and Sense Organs, School of Medicine, AOU Consorziiale Policlinico, University of Bari “Aldo Moro”, Piazza Giulio Cesare 11, 70124 Bari, Italy

Dr. Umberto Cottino

AO Ordine Mauriziano Hospital, Department of Orthopaedics and Traumatology, University of Torino, Largo Turati 62, 10128 Torino, Italy

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

The field of rehabilitation medicine is constantly expanding, all accompanied by the presence of new biomaterials and new concepts of biomechanics. This journal aims to promote the knowledge of new biomedical engineering devices in the prosthetic field. The knowledge and study of new prosthetic devices to rehabilitate parts of the human body certainly promotes research and clinic, improving the expectations of rehabilitated patients and certainly the quality of their life. The scientific society publishing high quality works will contribute to this.

Editor-in-Chief

Prof. Dr. Marco Cicciu

Department of Biomedical and Surgical and Biomedical Sciences,
Catania University, 95123 Catania, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Biomaterials) / CiteScore - Q1 (Oral Surgery)
