Special Issue

Finite Element Analysis in Prosthesis and Orthosis Research

Message from the Guest Editor

We are pleased to announce the launch of a Special Issue entitled “Finite Element Analysis in Prosthesis and Orthosis Research”. The aim of this Special Issue is to showcase the state-of-the-art advances in this area, and to seek papers related to finite element analysis (FEA) and its application in prosthesis and orthosis research and development. Furthermore, FEA is employed in the design and optimization of a wide range of implants including dental implants, artificial organs, upper and lower limb prostheses, orthotic insoles, braces, and splints, significantly changing the prosthetic and orthotic industry, and we would like to invite submissions on these domains as well. Both original research articles and review articles are welcome under this Special Issue. We encourage multinational collaboration for this Special Issue to submit novel studies with interdisciplinary work.

Guest Editor

Dr. Arnab Chanda

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Marco Cicciu
Department of Biomedical and Surgical and Biomedical Sciences, Catania University, 95123 Catania, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Biomaterials) / CiteScore - Q1 (Oral Surgery)
