

Special Issue

Antiviral and Antimicrobial Surface Design Strategies

Message from the Guest Editor

Topics of this special issue include but are not limited to papers dealing with materials coating (as aligned with *Prosthesis*' wide scope in the sense of epidemiological research on disabled conditions), antiviral and antibacterial surface construction on high-traffic objects such as elderly homes, hospitals, and doors and windows in public transportation. We are also open to considering the subjects and research on occupational hygiene and socio-medical aspects of prosthetic rehabilitation.

Guest Editor

Dr. Ajay Vikram Singh

Department of Chemical and Product Safety, German Federal Institute for Risk Assessment (BfR), Max-Dohrn-Strasse 8-10, 10589 Berlin, Germany

Deadline for manuscript submissions

closed (30 June 2022)
