

Special Issue

Prosthesis and Prosthetic Materials

Message from the Guest Editor

The objective of this special issue is to present some research underlying new diagnostic and therapeutic methods useful in prosthetic dentistry and, in the current scenario, challenges and perspectives in dentistry. The growth of pharmaceuticals and biomaterials as a research field has provided a novel set of therapeutic strategies for dental applications. The knowledge that has arisen from studies in the dental area may translate into new methods for caring or improving the alternatives used to treat patients in daily clinics. Keywords

- prosthesis
- prosthesis failure
- implant dentistry
- dental materials
- oral rehabilitation
- implant supported dental prosthesis

About the Journal

Message from the Editor-in-Chief

The field of rehabilitation medicine is constantly expanding, all accompanied by the presence of new biomaterials and new concepts of biomechanics. This journal aims to promote the knowledge of new biomedical engineering devices in the prosthetic field. The knowledge and study of new prosthetic devices to rehabilitate parts of the human body certainly promotes research and clinic, improving the expectations of rehabilitated patients and certainly the quality of their life. The scientific society publishing high quality works will contribute to this.

Editor-in-Chief

Prof. Dr. Marco Cicciu

Department of Biomedical and Surgical and Biomedical Sciences,
Catania University, 95123 Catania, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Biomaterials) / CiteScore - Q1 (Oral Surgery)
