Alexander-Universität Erlangen-  
Nürnberg, 91058 Erlangen,  
Germany

Deadline for manuscript  
submissions:

**closed (31 July 2020)**

### Message from the Guest Editors

Dear Colleagues,

As a global analysis technique, proteomics has become to an invaluable tool for the characterization of microbial processes from general physiology; biomedical and biotechnological aspects of individual bacteria, extending to interactions between commensal and pathogenic bacteria; and their respective host organisms, in the last two decades. This Special Issue will give an overview on the current status of microbial proteomics, but aims also to review recent highlights and challenges.

Assoc. Prof. Ansgar Poetsch

Prof. Andreas Burkovski

2. Institute for Globally  
Distributed Open Research and  
Education (IGDORE), Catharines,  
ON L2S 3A1, Canada

## Message from the Editorial Board

*Proteomes* is an international, peer-reviewed, open access journal that was first published in 2013 by MDPI. *Proteomes* addresses all aspects of proteome analysis with a special focus on the quantification and characterisation of the proteome at the level of proteoforms. We encourage submission of articles that accurately quantify and characterise the proteome, as well as new and updated methods and technologies that enhance the accurate quantification and characterisation of the proteome and thereby provide evidence directly facilitating the understanding of biological mechanisms. Articles emphasising a multi/ transdisciplinary approach combining different omics techniques are welcomed.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPUS / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Structural Biology)
