

## Special Issue

# Suicide and Mental Health

### Message from the Guest Editor

Psychiatry has provided the statistical evidence that a number of mental disorders, including schizophrenia, mood disorders, anxiety disorders and substance abuse, are suicide risk factors. In the last several decades, in response to general/global concerns posed by suicide, various research efforts have aimed to identify the theoretical risk and resilience factors of suicide. In spite of these efforts, recent meta-analysis studies indicated that the identified risk factors cannot contribute compared to a chance. Furthermore, dissociation between suicide risk and resilience factors emphasises that suicide resilience factors are not useful as predictors of suicide. Until recently, psychiatry and public health science have only reaffirmed that suicide is a very complicated multifactorial social phenomenon. In this Special Issue, we want to focus on the medical, social, and economic factors before and after suicide to interpret the reality behind the phenomenon of suicide.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Paolo Girardi  
Department of Dynamic and Clinical Psychology and Health Studies,  
Sapienza University of Rome, 00189 Rome, Italy

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the first half of 2025).
