submissions:

closed (30 June 2018)

Message from the Guest Editor

The use of digital technology in communication, including Scholarly Communication, is forming a new landscape where new tools and new publishing venues are being explored. Innovations in scholarly publications opened up new kinds of books (e.g., e-books apps), journals (e.g., open access) and formats (e.g., multimedia), gave rise to a range of indicators that enable additional ways of measuring the impact of what is produced (e.g., Altmetrics) and deeper levels of analysis (e.g., Article Level Metrics), among other transfigurations of well-known practices. Digital Libraries, digital archives and repositories of all kinds are just an expression of this dynamic reality, allowing, by the exposition of their content, the application of digital tools to its reinterpretation in wider contexts.

To sum up, the digital world is transforming the way we access, produce, analyze and disseminate knowledge. This Special Issue invites authors to submit articles on digital scholarly publishing that explore these changes and the implications that may have in all the stakeholders involved on contemporary practices of doing science.

Message from the Editor-in-Chief

As the Editor-in-Chief of Publications (ISSN 2304-6775), I warmly invite you to submit your research for consideration for publication in our journal. Publications is an international, peer reviewed, fully Open Access journal that provides an advanced forum for research studies related to all aspects of scholarly publishing. While primarily a vehicle for research and review articles, we will also publish, from time to time, case studies and opinion pieces. We aim to offer high-quality, responsible services and rapid decision-making so that submitting and publishing with us should be a rewarding experience. If you wish to discuss your ideas for submission in advance, or if you have topics for potential Special Issues you would like us to consider, or indeed have any queries about any other aspect of Publications, then please do not hesitate to contact me personally at: tross@know-center.at.

Author Benefits

Open Access: - free for readers, free publication for well-prepared manuscripts submitted in 2019.

High visibility: Indexed in the Emerging Sources Citation Index (ESCI - Web of Science), Scopus from Vol. 5 (2017) and other databases.

Open Peer-Review: authors have the option for all reviewer comments and editorial decisions to be published along with the final paper. For more, see: Editorial, Paper with Review Comments.
