

# Special Issue

## Feature Papers in Quaternary

### Message from the Guest Editor

As Editor-in-Chief of *Quaternary*, I am glad to announce the Special Issue "Feature Papers". This will be a collection of high-quality papers (original research articles or comprehensive reviews) from top academics addressing the interdisciplinary nature of Quaternary Science. We welcome the submission of manuscripts from Editorial Board Members and from outstanding scholars invited by the Editorial Board and the Editorial Office, related to any of the diverse scientific disciplines covered by the scope of the journal:

<http://www.mdpi.com/journal/quaternary/about>. You are welcome to send short proposals for submissions to our Editorial Office ([quaternary@mdpi.com](mailto:quaternary@mdpi.com)) for evaluation. Please note that selected full papers will still be subject to a thorough and rigorous peer-review.

## About the Journal

### Message from the Editor-in-Chief

We live in a Quaternary world, that is, a world shaped by the interplay of the different compartments of the earth system—lithosphere, hydrosphere, atmosphere, biosphere, cryosphere—during the last ~2.6 million years. It is not possible to understand the current world—and, hence, to anticipate its possible future developments—without knowing the Quaternary history of drivers, processes, and mechanisms that have generated it. Our own species is an evolutionary outcome of the Quaternary performance. Therefore, the journal *Quaternary* is born with the aim of being an integrative journal to encompass all aspects of Quaternary science focused on understanding the complex world in which we live and to provide a sound scientific basis to anticipate possible future trends and inform environmental policies.

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, and other databases.

#### Journal Rank:

CiteScore - Q2 (Earth and Planetary Sciences  
(miscellaneous))
