

Special Issue

Sustainable Materials from Waste and Renewable Sources

Message from the Guest Editor

In recent years, the possibilities for the application and development of sustainable materials from waste and renewable sources have begun to gain global recognition. There has been a significant increase in research and interest in geopolymer materials (mostly those made of waste materials). The possible uses of sustainable material sources appear endless, and their application has been recognized in almost all technological fields. The main purpose of this Special Issue is to publish innovative research and critical analyses related to various types of sustainable materials from waste and renewable sources, geopolymers and composites based on geopolymers or alkaline-activated materials. We encourage you to share innovative research in all areas related to sustainable materials from waste and renewable sources.

Guest Editor

Dr. Dariusz Mierzwiński

Department of Materials Engineering, Faculty of Materials Engineering and Physics, Cracow University of Technology, Al. Jana Pawła II 37, 31-864 Kraków, Poland

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Michele John
Sustainable Engineering Group, Curtin University, Perth, WA 6845,
Australia

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), FSTA, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q1 (Management, Monitoring, Policy and Law)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.9 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the first half of 2025).
