**Dr. Mariusz Tabaczek**

Faculty of Theology, Pontifical University of St. Thomas Aquinas, 00184 Roma, Italy

Deadline for manuscript submissions:

**closed (30 March 2023)**

### Message from the Guest Editors

This special issue titled “Science-Engaged Approach to Origins and Theodicy: Old Questions, New Horizons” seeks to encourage authors to make a more direct use of scientific knowledge in addressing some of the old and new questions concerning the origins and theodicy. This implies the use of scientific knowledge as an auxiliary tool that can contribute to a better understanding of certain theological topics. Can evolutionary anthropology help us to understand better the original state of first humans? Should population genetics have a decisive impact on mono- versus -polygenism debate? Can evolutionary medical understanding of pain be helpful in addressing the topic of pain in theodicy? Can psychological insights on suffering be of help when we think about suffering of humans? How can we use insights from cognitive science in the study of our behavior and moral development?

Caritaswissenschaft und  
Christliche Sozialarbeit,  
Theologische Fakultät, Albert-  
Ludwigs-Universität Freiburg,  
Platz der Universität 3, D-79098  
Freiburg, Germany

## Message from the Editorial Board

Fresh developments in the disciplines that consistently make significant contributions to our understanding of religious personality, authority, devotion, and community - disciplines ranging from psychology, sociology, and anthropology to history, art history, philosophy, literary criticism, and political science – fuel general, as well as scholarly, interest in the world's religions.

*Religions* is inviting innovative and comparative contributions. Please consider Religions as an exceptional, exciting enterprise ready to reward your trust, attention, and participation.

## Author Benefits
