Hebrew Bible: Text, Culture, and Archaeology

Message from the Guest Editor

The text of the Old Testament/Hebrew Bible has held a sacred place in the hearts and minds of Jews, Christians, and many others for thousands of years. Generations of rabbis, priests, and other scholars have examined the text through the eyes of faith as a source of guidance, comfort, and as a framework for understanding the deep meaning of the world and our place in it. A dramatic shift began to occur with the advent of the Enlightenment.

This Special Issue aims to introduce historical research and archaeological and material evidence into the conversation on the text of the Old Testament/Hebrew Bible. The journal *Religions* (ISSN 2077-1444) is “an international, open access scholarly journal, publishing peer reviewed studies of religious thought and practice. It is available online to promote critical, hermeneutical, historical, and constructive conversations. *Religions* publishes regular research papers, reviews, communications and reports on research projects”. The scope of the journal *Religions* includes comparative studies in religion and politics, the history and sociology of religions, and the role of religion in culture and society.

About the Journal

Message from the Editorial Board

Fresh developments in the disciplines that consistently make significant contributions to our understanding of religious personality, authority, devotion, and community – disciplines ranging from psychology, sociology, and anthropology to history, art history, philosophy, literary criticism, and political science – fuel general, as well as scholarly, interest in the world's religions.

Religions is inviting innovative and comparative contributions. Please consider Religions as an exceptional, exciting enterprise ready to reward your trust, attention, and participation.
