

Special Issue

Psychological Perspectives on Religion and Well-Being

Message from the Guest Editor

This Special Issue is focused on assembling a selection of contemporary reviews and empirical studies that are grounded in psychological theories and methods that have examined the relationship between religion and well-being (see Abdel-Khalek, 2020 for definitions). The purpose of the present issue is to enrich the scholarly debate and understanding of the variety of different psychological perspectives related to religion and well-being. We are pleased to invite you to submit a review or empirical study that is grounded in psychological theories and methods that have examined the relationship between religion and well-being. In this Special Issue, original reviews and research articles are welcome. Research areas may include (but are not limited to) the following:

- Religion and well-being in different cultural contexts.
- Religion and well-being in different religious contexts.
- Religion and well-being in clinical and non-clinical samples.
- Measurement issues concerning religion and well-being.
- Cross-cultural studies examining religion and well-being.

About the Journal

Message from the Editorial Board

Fresh developments in the disciplines that consistently make significant contributions to our understanding of religious personality, authority, devotion, and community – disciplines ranging from psychology, sociology, and anthropology to history, art history, philosophy, literary criticism, and political science – fuel general, as well as scholarly, interest in the world's religions.

Religions is inviting innovative and comparative contributions. Please consider Religions as an exceptional, exciting enterprise ready to reward your trust, attention, and participation.
