

Special Issue

Body and Religion

Message from the Guest Editor

The body is significant materially and symbolically for producing meaning in the history of religions and cross-culturally. Imagery of the body, body parts, the senses as well as rituals have contributed to the cultural construction of the self, gender, morality, and divinity. Philosophical concepts of mind-body dualism and religious institutions dictating social hierarchies and power relations have disciplined "lived bodies" and shaped embodied social/political/religious practices and roles. This volume brings together trans-disciplinary and innovative approaches to the discourse of the body and religion.

About the Journal

Message from the Editorial Board

Fresh developments in the disciplines that consistently make significant contributions to our understanding of religious personality, authority, devotion, and community – disciplines ranging from psychology, sociology, and anthropology to history, art history, philosophy, literary criticism, and political science – fuel general, as well as scholarly, interest in the world's religions.

Religions is inviting innovative and comparative contributions. Please consider Religions as an exceptional, exciting enterprise ready to reward your trust, attention, and participation.
