Deadline for manuscript
submissions:

30 June 2021

Message from the Guest Editor

This Special Issue aims to report the latest advances and trends concerning the advanced artificial learning and data science techniques to the remote sensing data processing issues. Papers of both theoretical and applicative nature, as well as contributions regarding new advanced artificial learning and data science techniques for the remote sensing research community are welcome. Topics of interest mainly include but are not limited to:

- Artificial intelligence and data science approach for remote sensing
- Reinforcement learning for remote sensing
- Information retrieval for remote sensing
- Big data analytics for beyond 5G
- Edge/fog computing for remote sensing
- IoT data analytics in remote sensing
- Data-driven applications in remote sensing
