Gronostajowa 7, 30-387 Krakow,
Poland

2. Department of Environmental
Science, Policy & Management,
University of California, Berkeley,
326 Mulford Hall, Berkeley, CA
94720, USA

Message from the Guest Editor

This Special Issue is aiming to cover the most recent advances in techniques and algorithms to process remotely sensed information for ecology and conservation in the high-altitude and high-latitude regions. Welcomed contributions include:

- developments in Earth observation Data Cubes use,
- improvements in data fusion techniques,
- novel use of high to very-high resolution Earth observation data,
- advances in cloud-based computing.

Deadline for manuscript
submissions:

closed (31 December 2020)

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
