

Big Data in Remote Sensing for Urban Mapping

Guest Editors:

Dr. Marian-Daniel Iordache

Remote Sensing Department,
Flemish Institute for
Technological Research (VITO-
TAP), 2400 Mol, Belgium

Prof. Dr. Begüm Demir

Remote Sensing Image Analysis
(RSIM) Group, Technische
Universität Berlin, 10587 Berlin,
Germany

Dr. Claudio Persello

Department of Earth Observation
Science, Faculty of Geo-
Information Science and Earth
Observation (ITC), University of
Twente, P.O. Box 217, 7500 AE
Enschede, The Netherlands

Deadline for manuscript
submissions:

closed (29 February 2020)

Message from the Guest Editors

In this Special Issue, submissions in a broad range of “Big Data in Remote Sensing for Urban Mapping” related research and applications are encouraged. Topics may include but are not limited to:

- Urban big data processing, analysis and management;
- Multisensor and multiresolution data analysis/validation for urban mapping;
- Machine and deep learning for urban dynamics characterization;
- Land-use and land-cover change monitoring for urban areas;
- Large-scale 2D and 3D urban modeling;
- Urban planning with big data evaluation and assessment;
- Inference of environmental variables (e.g., socioeconomic indicators, population density, life-quality indicators, air pollution) for urban dynamics characterization;
- Interactive platforms for public access to scientific results on urban mapping.

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
