submissions:

**31 May 2020**

### Message from the Guest Editors

Dear Colleagues,

The objective of the Special Issue is to showcase the state-of-the-art in utilizing remote sensing data for food–energy–water (FEW) nexus studies in different sectors (e.g., agriculture, water supply, energy) and different geographic regions.

Manuscripts for this issue should fulfil the following criteria:

- Research encompassing all three components of the nexus are highly encouraged; however, studies focusing on two components of the nexus are also welcome.
- Research should apply remote sensing data to address at least one of the components of the nexus.
- Innovative ways of utilizing remote sensing data in the study of the nexus is highly encouraged.

Dr. Mekonnen Gebremichael
