

## **Innovative Remote Sensing for Monitoring and Assessment of Natural Resources**

Guest Editors:

**Dr. Francesco Pirotti**

Department of Land,  
Environment, Agriculture and  
Forestry, University of Padova,  
Padova, Italy

**Dr. Mitsunori Yoshimura**

Department of Forest Science,  
College of Bioresource Sciences,  
Nihon University 1866, Kameino,  
Fujisawa 252-0880, Japan

**Prof. Dr. Baoxin Hu**

Department of Earth and Space  
Science and Engineering,  
Lassonde School of Engineering,  
York University, 4700 Keele St,  
Toronto, ON M3J 1P3, Canada

Deadline for manuscript  
submissions:

**closed (30 November 2019)**

### **Message from the Guest Editors**

Adequate monitoring and assessment of the condition of natural resources remains a prerequisite for supporting environmental decisions and for tracking effects over time. This special issue aims to summarize the latest progress in techniques and algorithms developed for monitoring and assessment of natural resources. Authors are invited to contribute to this special Issue of Remote Sensing by submitting an original manuscript. Contributions may focus on, but are not limited to:

1. new and improved algorithms for data processing and information extraction related to natural resources;
2. application of multi-sensor and multi-scale approaches;
3. multi-temporal analysis of imagery to define trends over time;
4. effects of land-cover changes on natural resources - e.g. urbanization, desertification;
5. close-range sensing applications, e.g. from remotely piloted aircraft systems;
6. quantification of risk and hazard related to natural resources;
7. new possibilities available from new sensors and platforms;

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
