**Dr. Lionel Gueguen**

**Dr. Arnaud Le Bris**

**Prof. Dr. Jun Chen**

Deadline for manuscript  
submissions:

**closed (31 August 2020)**

### Message from the Guest Editors

Dear Colleagues,  
Land cover/land use (LC/LU) description is the core information layer for many interdisciplinary scientific and environmental studies. Accurate and up-to-date maps over large areas are mandatory baselines. A significant number of public policies are driven by such knowledge. Remote sensing through automatic Earth-Observation image analysis has been widely recognised as the most feasible approach to derive LC/LU information, in particular in operational contexts. This Special Issue aims at collecting new developments and methodologies, best practices, and applications related to operational land cover/land use mapping. We welcome submissions that provide the community with the most recent advancements on: automatic and semi-automatic data processing, versatility and reproducibility of processing chains, upscaling, continuous monitoring and change detection, optimal exploitation of existing data sources and, rigorous accuracy assessment protocols.

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
