Quantitative Remote Sensing of Land Surface Variables

Guest Editors:

Message from the Guest Editors

Dr. Dongdong Wang Dear Colleagues,

Assoc. Prof. Dr. Vasit Sagan

Dr. Pierre C. Guillevic

Deadline for manuscript submissions: closed (31 December 2018) Remote sensing is a unique tool used to observe the Earth system, and to quantitatively monitor a variety of key landsurface variables by measuring radiation reflected or emitted by the Earth. With the availability of more and more remote sensing data from various types of instruments with different spectral characteristics and temporal and spatial resolutions, the field of quantitative land remote sensing is advancing at an unprecedented rate.

This Special Issue solicits papers on recent progress in the field of quantitative remote sensing of land surface variables. We welcome submissions that provide the community with the most recent advances in all aspects of quantitative land remote sensing, including, but not limited to:

- Research on land remote sensing theory, methodology and practice
- Algorithm development to retrieve various land surface variables
- Assessment and validation of retrieval algorithm and remote sensing data products
- Analysis and application of land remote sensing data and products

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
