Message from the Guest Editor

Dear Colleagues,

Virtual Forest is a computer-based replica of the real forest which is assumed to be of interest for professional and non-professional forest users. For example, forest owners, buyers, and decision makers can walk about the wanted forests virtually from any place. In this special issue we are especially looking for multidisciplinary papers describing

- Creation of Virtual Forests, Point Cloud Processing and Texturing Algorithms and Computer Science related to creation of the Virtual Forest
- High-quality visualization techniques of Virtual Forests
- Novel Application, Virtual Services, Serious Games and future visions related to using Virtual Forests
- Use of Virtual Forest for the benefit of Forestry, especially Precision Forestry
- Use of Novel concepts

Prof. Juha Hyypä

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
