Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to investigate matters relating to:

1) technologies for sea observation and monitoring (waves, currents, bathymetry, wind);

2) monitoring of water chemical and physical parameters;

3) assimilation of marine coastal and deep environment data into numerical models;

4) technology and techniques for oil spill detection and analysis;

5) technologies and techniques for ships and objects detection.

Dr. Francesco Serafino
Dr. Claudio Lugni
Prof. Maurizio Brocchini
