# **Regional Scale Interferometric Applications**

Guest Editors:

### Dr. Lorenzo Solari

Department of Earth Sciences, University of Firenze, Via La Pira 4, 50121 Firenze, Italy

### Dr. Andrea Ciampalini

Department of Earth Sciences, University of Pisa, Via Santa Maria 53, Pisa, Italy

#### Dr. Silvia Bianchini

Department of Earth Sciences, University of Florence, Via La Pira, 4, 50121 Florence, Italy

Deadline for manuscript submissions:

closed (31 May 2021)

# **Message from the Guest Editors**

Advanced synthetic aperture interferometry (A-DInSAR) is considered a consolidated tool for ground motion detection and monitoring. A-DInSAR products begin to be not only a post-event tool or a support and validation for local scale or single-phenomenon motoring activities. In fact, the evolution of interferometric applications follows the increasing demand for ground deformation mapping over large territories (municipalities, regions, nations), showing where and how something is moving. This is not only a requirement for setting up long-term hydrogeological risk plans but also for proper funding allocation.

We welcome papers regarding:

- Wide area interferometric applications;
- New processing strategies for the management of large stacks of interferometric products over wide areas:
- New tools and methodologies for extracting reliable information from a large stack of interferometric data:
- New tools and methodologies for data interpretation at regional scale;
- Technical notes about the correct use and dissemination of interferometric products at regional scale.

Specialsue

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend Remote Sensing for your best research publications for a fast dissemination of your research.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
