Sciences, College of Science &  
Engineering, University of  
Glasgow, Glasgow G12 8QQ, UK

### Dr. Claudio Persello

Faculty of Geo-Information  
Science and Earth Observation  
(ITC) of the University of Twente,  
Department of Earth Observation  
Science, P.O. Box 217, 7500 AE  
Enschede, The Netherlands

Deadline for manuscript  
submissions:

**closed (31 December 2020)**

### Message from the Guest Editors

Dear Colleagues,

Cities are not only the sites of many of the problems plaguing mankind, they also happen to be the birthplace of a great many solutions to these issues. Urban informatics is geodata-intensive, which is usually beyond traditional GIS layers and often includes other open governmental data or firm/user-generated contents. Clearly, there is enormous potential in research synergy by integrating remote sensing and urban informatics.

Therefore, this Special Issue aims to advance theories, methods, and applications in order to produce new knowledge and integrate in remote sensing with urban informatics. We anticipate studies including but not limited to the development and application of frameworks of remote sensing and urban informatics integration, geodata collection and management practices in remote sensing and urban informatics integration, applications of big geodata to study urban dynamics, socio-economic variabilities, and urban resilience to climate change.

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
