

Special Issue

Remote Sensing for Landscape Dynamics

Message from the Guest Editors

This Special Issue invites high-quality submissions that focus on the remote sensing monitoring and analysis of landscape dynamics, and mainly collects the following three types of research results: First, landscape change detection and process monitoring, including land use/cover change, vegetation succession and degradation recovery, the impact of natural disasters on landscape structure, as well as data acquisition and analysis based on high-resolution remote sensing and unmanned aerial vehicles. Second, landscape pattern analysis and ecological modeling, covering landscape fragmentation, ecological connectivity assessment, evolution of urban-rural transition zones, as well as the integrated application of remote sensing and ecological models. Third, advanced technologies for spatio-temporal analysis and prediction, focusing on multi-temporal and multi-source data fusion, long-term time series analysis, climate change impacts, and the innovative application of machine learning, deep learning, and large language models in landscape dynamics monitoring and modeling.

Guest Editors

Dr. Peipei Wang

Dr. Wei Han

Dr. Yuanyuan Zhao

Prof. Dr. Xinqi Zheng

Deadline for manuscript submissions

30 January 2026

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
