Special Issue

3D Point Clouds in Forest Remote Sensing III

Message from the Guest Editors

This Special Issue is a sequel of a previous Special Issue entitled "3D Point Clouds in Forest Remote Sensing II". This Special Issue aims to include studies covering different uses of 3D point clouds acquired using different sensors and platforms in forest sciences. Topics may cover anything from the classical estimation of forest variables at a tree or stand level, to more comprehensive aims and scales. Hence, multisource data integration (e.g., multispectral, hyperspectral, and thermal), multiscale approaches, or studies focused on monitoring forest ecosystem services, among other issues, are welcome. Articles may address, but are not limited, to the following topics:

- Tree and stand variable inventory;
- Forest land cover mapping and pattern analysis;
- Forest planning and management;
- Forest ecology;
- Forest change;
- Biodiversity and wildlife;
- Forest fuel and fire studies;
- Biotic and abiotic forest damage;
- Biomass;
- Forest plants' functional traits;
- Carbon cycle/sequestration;
- Terrain analysis.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail
Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
