

Special Issue

Application of Remote Sensing and Spatial Analysis for Environmental Management in the Global South

Message from the Guest Editors

We welcome manuscripts exploring all aspects of applied spatial analysis and environmental remote sensing in the Global South, particularly the ones which explicitly discuss how remote sensing can be used for environmental management.

- Applications of environmental remote sensing and spatial analysis in the Global South;
- How remote sensing and spatial analysis can support environmental management;
- Evaluating environmental change over time;
- Evaluating the impact of environmental management initiatives and projects;
- Monitoring changes in natural resource availability (including water resources, forest resources, agricultural resources, geological resources, etc.);
- How remote sensing can support environmental hazard and disaster monitoring, modelling, and management;
- Comparison of remote sensing data sources and methodologies for environmental management;
- New remote sensing data and methodologies for monitoring the environment.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
