

Special Issue

Space-Geodetic Techniques (Third Edition)

Message from the Guest Editors

This third Special Issue welcomes all studies related to applications of different space-geodetic techniques in space and ground observations across the fields of planetary and Earth sciences. The topics may cover anything from the classical estimation of high-precision Earth observation, to more comprehensive aims and scales. Articles may address, but are not limited to, these topics:

- Global and regional gravity field modeling;
- Satellite gravimetry and applications in global change;
- Satellite altimetry and oceanography;
- Geodetic remote sensing;
- Applications of remote sensing in the global water cycle;
- Next-generation positioning;
- Techniques and applications in high-precision GNSS;
- Atmosphere modeling and monitoring;
- Space weather research;
- GNSS reflectometry;
- Geodetic observations and geodynamics;
- Crust deformation and natural hazard monitoring;
- Earth rotation;
- Planetary geodesy

Guest Editors

Dr. Xiaogong Hu

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
