Special Issue

Advances in Remote Sensing for Glacier Preservation

Message from the Guest Editors

This Special Issue seeks studies that integrate multisource data (e.g., satellite, UAS, ground-based sensors) and innovative methodologies, such as machine learning, SAR/InSAR, and hyperspectral imaging, to quantify glacier dynamics, mass balance, surface processes, and human-induced impacts (e.g., infrastructure development, pollution). Contributions may span scales from local glacial basins to regional/global assessments, focusing on translating observations into actionable strategies for conservation. Articles may address, but are not limited to, to the following topics:

- Glacier velocity, thickness, and volume change detection;
- Supraglacial and subglacial process monitoring (e.g., meltwater, debris cover);
- Impacts of anthropogenic activities (e.g., road construction, black carbon deposition);
- Multisensor data fusion and novel algorithm development;
- Predictive modeling of glacier retreat and water resource security;
- High-resolution mapping of glacial hazards (e.g., avalanches, GLOFs);
- Integration of remote sensing with in situ and climate data;
- Policy-relevant frameworks for cryosphere conservation.

Guest Editors

Dr. Feiteng Wang

Dr. Chunhai Xu

Prof. Dr. Qiao Liu

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail
Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
