

Special Issue

Advanced Technologies for Position and Navigation under GNSS Signal Challenging or Denied Environments III

Message from the Guest Editors

This Special Issue aims to provide a platform for researchers to publish innovative work addressing recent advances in position and navigation under GNSS signal-challenging or denied environments. Specifically, we invite contributions concerning the following topics:

- GNSS multipath, NLOS and spoofing identification, mitigation or correction;
- LiDAR/Visual SLAM;
- Indoor position with new technologies;
- Multi-sensor integration and fusion;
- Micro-Technology for Positioning, Navigation, and Timing;
- Cooperative navigation;
- RAIM and fault detection;
- RTK or PPP in urban areas.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.
