# **Special Issue**

## Remote Sensing Based Monitoring of Terrestrial Ecosystem Service Bundles, Trade-Offs and Synergies (Second Edition)

## Message from the Guest Editors

This Special Issue is a sequel of the previous Special Issue "Remote Sensing Based Monitoring of Terrestrial Ecosystem Service Bundles, Trade-Offs and Synergies". We welcome contributions from studies focusing on the use of remote sensing technology to investigate two or more terrestrial ecosystem services. These studies may consider any technology that enables stand-off collection of data in order to get an improved representation of either a soil property, plant characteristic or land surface process, with the objective to assess the delivery of multiple ecosystem services. Hence, the present Special Issue will host papers considering a wide range of terrestrial ecosystem services as well as spatial and temporal scales. However, particular interest will be given to research that aims to assess ecosystem service bundles, tradeoffs, and synergies and obtain insights into the associated environmental feedbacks, including climate change, land use change and agromanagement.

## **Guest Editors**

Dr. Jeroen Meersmans

Dr. Toby Waine

Prof. Dr. Jian Peng

**Deadline for manuscript submissions** closed (30 April 2025)

## About the Journal

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peerreview process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

## Author Benefits

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.
