

Special Issue

Remote Sensing Image Classification and Semantic Segmentation (Second Edition)

Message from the Guest Editors

This Special Issue aims to develop state-of-the-art deep networks for more accurate remote sensing image classification and semantic segmentation. Furthermore, it also aims to achieve a cross-domain performance with high efficiency through a lightweight network design.

This Special Issue encourages authors to submit research articles, review articles or application-oriented articles on topics regarding remote sensing image classification, semantic segmentation, detection, spectral super-resolution and understanding-related works; these include, but are not limited to, the following topics:

- Machine/deep-learning-based algorithms;
- Remote sensing image processing and pattern recognition;
- Image classification;
- Semantic segmentation;
- Target detection/change detection;
- Image or data fusion/fusion classification;
- Lightweight deep neural networks;
- Domain-adaptation/few-shot-learning/meta-learning-based algorithms;
- Onboard real-time applications.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
