Special Issue

Advancements in Microwave Radiometry for Atmospheric Remote Sensing

Message from the Guest Editors

The aim of this Special Issue is to explore the latest advancements in microwave radiometry for atmospheric remote sensing. We invite submissions that showcase innovative methodologies, techniques, and applications related to microwave radiometry analysis in the context of atmospheric remote sensing. We welcome research articles, reviews, and case studies that address the following topics:

- Microwave radiometry data acquisition and preprocessing techniques for atmospheric remote sensing.
- Development and validation of algorithms and models for the microwave radiometry-based retrieval of atmospheric parameters.
- Integration of microwave radiometry data with other sensing and in situ observations for comprehensive atmospheric assessments.
- Applications of microwave radiometry in weather forecasting, climate modeling, and air quality monitoring.
- Evaluation of the effectiveness of microwave radiometry in supporting decision-making in atmospheric sciences.

Guest Editors

Dr. Ada Vittoria Bosisio
Italian National Research Council (IEIIT Institute), Milano, Italy
Dr. Jungho Kim
First Street Foundation, Brooklyn, NY 11201, USA

Deadline for manuscript submissions

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail
Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang
Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
